# Astra相机使用方法

官网链接: https://orbbec3d.com/develop/

Astra相机: <a href="https://github.com/orbbec/ros">https://github.com/orbbec/ros</a> astra camera

普通相机: https://github.com/bosch-ros-pkg/usb cam.git

开发者社区: <a href="https://developer.orbbec.com.cn/download.html?id=53">https://developer.orbbec.com.cn/download.html?id=53</a>

Astra SDK搭建官方视频教程: <a href="https://developer.orbbec.com.cn/develop\_details.html?id=3">https://developer.orbbec.com.cn/develop\_details.html?id=3</a>

Create astra udev rule (单品深度相机需执行)

cd ~/astra\_ws/src
./create.sh

#### launch启动命令

| Launch文件          | 启动相机型号                                |
|-------------------|---------------------------------------|
| astra.launch      | Astra,Astra S,Astra mini,Astra mini S |
| astraplus.launch  | Astra plus                            |
| astrapro.launch   | Astra pro                             |
| embedded_s.launch | Deeyea                                |
| dabai_u3.launch   | Dabai                                 |
| gemini.launch     | Gemini                                |

## 1、SDK使用-Linux

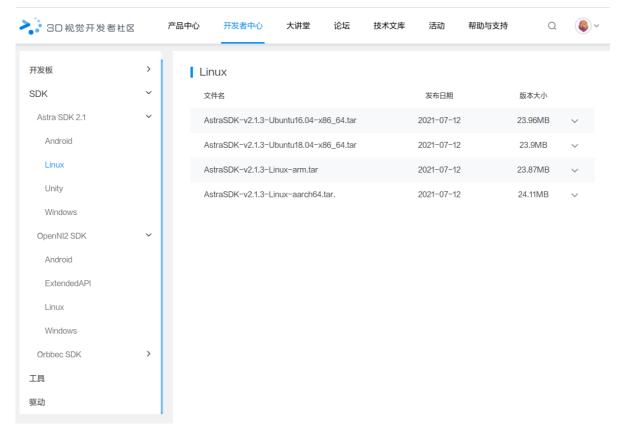

运行环境:虚拟机或双系统

开发者社区: https://developer.orbbec.com.cn/download.html?id=53

#### 1.1、依赖环境

sudo apt-get install ros-melodic-serial ros-melodic-bfl ros-melodic-mbf-msgs ros-melodic-pointcloud-to-laserscan ros-melodic-rgbd-launch ros-melodic-libuvc-\* ros-melodic-uvc-camera ros-melodic-usb-cam ros-melodic-ar-track-alvar ros-melodic-camera-calibration build-essential freeglut3 freeglut3-dev libsfml-dev

去开发者社区下载SDK文件,即(Astra SDK和OpenNI2 SDK,版本、系统架构要匹配)

### 1.2、相机SDK&Samples

文件夹名可能不相同,根据自己需求更改。

```
tar -zxvf AstraSDK-v2.1.3-Ubuntu18.04-x86_64.tar.gz
cd AstraSDK-v2.1.3-Ubuntu18.04-x86_64.tar.gz/install # 进入install文件夹
sudo sh ./install.sh
```

输出结果包含以下两行,注意把倒数第二个路径里的install删掉:

```
export ASTRA_SDK_INCLUDE=/home/yahboom/astra/AstraSDK-v2.1.3-Ubuntu18.04-x86_64/install/include
export ASTRA_SDK_LIB=/home/yahboom/astra/AstraSDK-v2.1.3-Ubuntu18.04-x86_64/install/lib
```

#### 删掉install之后:

```
export ASTRA_SDK_INCLUDE=/home/yahboom/astra/AstraSDK-v2.1.3-Ubuntu18.04-
x86_64/include
export ASTRA_SDK_LIB=/home/yahboom/astra/AstraSDK-v2.1.3-Ubuntu18.04-x86_64/lib
```

将输出结果复制到~/.bashrc尾部

```
gedit ~/.bashrc
source ~/.bashrc
```

amples目录中即是示例程序,需要依赖include和lib目录

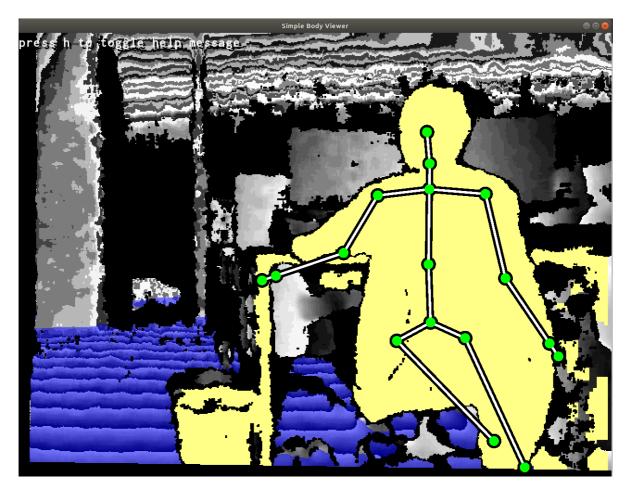

• SFML效果演示

bin文件夹如下:

| astra-tests              |  |
|--------------------------|--|
| BodyReaderPoll           |  |
| ColorizedBodyViewer-SFML |  |
| ColorReaderEvent         |  |
| ColorReaderEventCPP      |  |
| ColorReaderPoll          |  |
| DebugHandViewer          |  |
| DepthReaderEvent         |  |
| DepthReaderEventCPP      |  |
| DepthReaderPoll          |  |
| HandReader               |  |
| ▲ Inconsolata.otf        |  |
| InfraredColorReaderEvent |  |
| InfraredReaderEvent      |  |
| InfraredReaderPoll       |  |
| MaskedColorViewer-SFML   |  |
| MultiSensorViewer-SFML   |  |
| RotatedBodyViewer-SFML   |  |
| SimpleBodyViewer-SFML    |  |
| SimpleColorViewer-SFML   |  |
| SimpleDepthViewer-SFML   |  |
| SimpleHandViewer-SFML    |  |
| SimpleStreamViewer-SFML  |  |
|                          |  |

注意: bin文件夹下均可采取sudo ./或./的方式启动,启动后缀带有-SFML的文件,有画面显示;方式都类似,其他效果可以进行测试。在虚拟机会有启动不成功得现象,请多试几次,目前不清楚什么原因,在双系统下比较容易启动。

```
cd ~/AstraSDK-v2.1.3-Ubuntu18.04-x86_64/bin/
./SimpleBodyViewer-SFML # 骨骼检测
./SimpleHandViewer-SFML # 手指跟随
```

## 1.3、OpenNI相机测试工具

#### 安装OpenNI

```
unzip OpenNI_2.3.0.55.zip
cd OpenNI_2.3.0.55/Linux/OpenNI-Linux-x64-2.3.0.55
chmod +x install.sh
sudo ./install.sh
```

### 重新拔插设备 初始化OpenNI环境

source OpenNIDevEnvironment

### 编译运行

cd Samples/SimpleViewer
make
cd Bin/x64-Release
./SimpleViewer

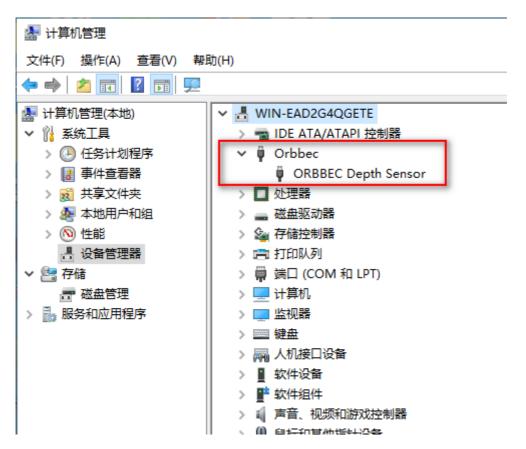

## 2、AstraSDK-win

https://developer.orbbec.com.cn/download.html?id=31

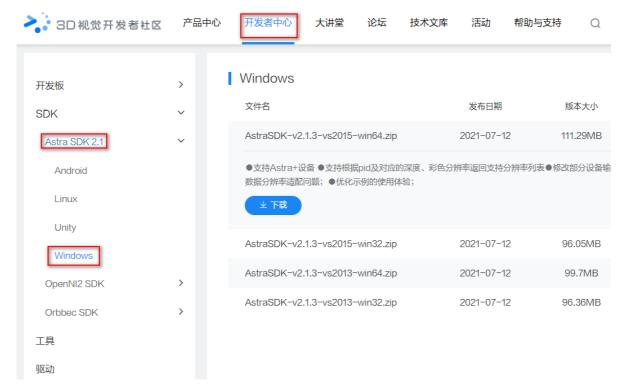

### 2.1、安装驱动

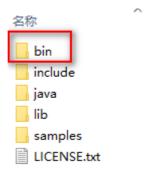

下载完毕后,双击安装即可。成功的标志如下

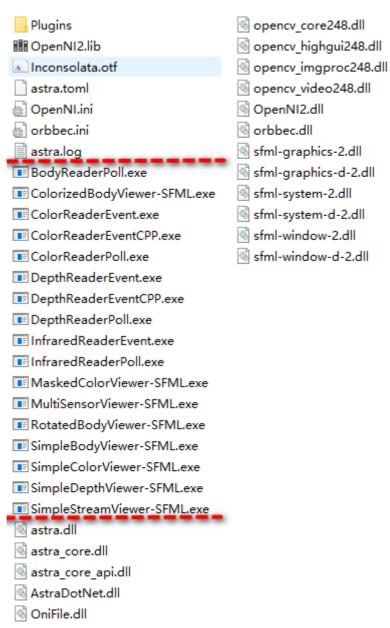

### 2.2、下载SDK

下载完毕后,解压该文件夹,

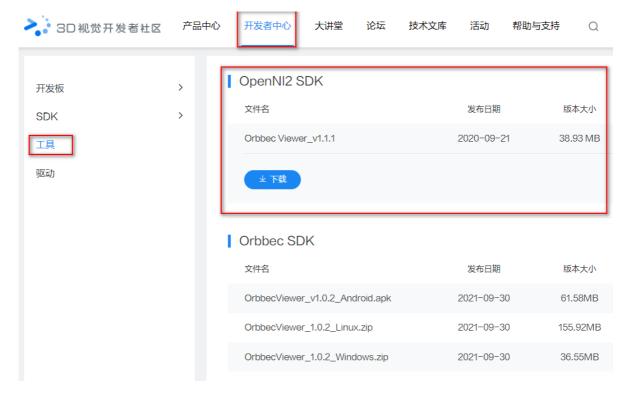

进入bin文件夹,双击后缀带有exe的任意文件测试即可。

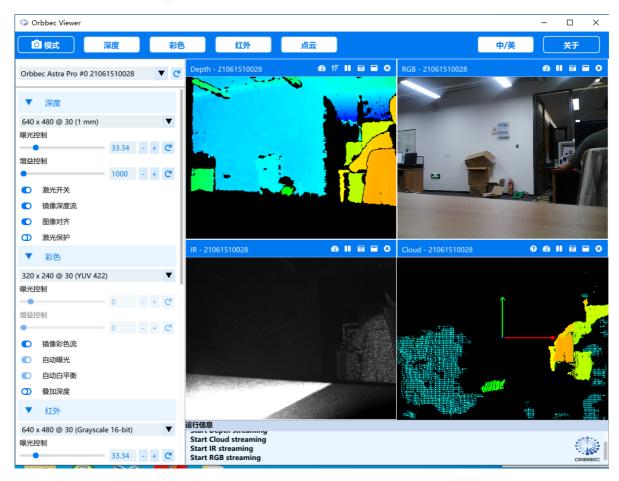

### 3. OrbbecViewer-win

https://developer.orbbec.com.cn/download.html?id=31

解压,进入OrbbecViewer\_v1.1.1文件夹,双击即可。

## 4、网页监控

#### 环境搭建

sudo apt-get install ros-melodic-async-web-server-cpp ros-melodic-web-video-server ros-melodic-usb-cam

roslaunch astra\_camera astrapro.launch # Astra
roslaunch usb\_cam usb\_cam-test.launch # USB

启动web\_video\_server

rosrun web\_video\_server web\_video\_server

#### 查看

本地web浏览器查看

http://localhost:8080/

必须在同一个局域网下,其他设备查看 http://192.168.2.103:8080/ (192.168.2.103为该主控的IP地址)

注意:建议使用谷歌浏览器或手机QQ浏览器,其他浏览器可能无法打开图像
